PROFIL

Full Stack Engineer with an engineering background and hands-on experience in modern system development within a production environment. I develop scalable backend and frontend solutions using Node.js, TypeScript, React and SQL, working with REST APIs, CI/CD pipelines and containerized environments. I focus on writing clean, maintainable code and building reliable systems with performance and long-term quality in mind.

I thrive in fast-paced product environments where collaboration with designers, product owners and developers is essential. Motivated by continuous improvement, I take responsibility for code quality, architecture decisions and efficient delivery. I am driven by solving complex problems and contributing to scalable, cloud-ready applications.

PROFESSIONAL EXPERIENCE

Intern Software Engineer
Peak Energy | Dec 2025 – Present

- Backend & frontend development (Node.js, TypeScript, JavaScript)
- REST APIs, SQL databases, Docker
- CI/CD pipelines (CircleCI) in production environment
- Agile team collaboration with focus on quality and scalability

Project Manager / Operations Manager
OGR Handel & Service, Malmö | 2021 – 2024

- Led operations, planning and resource coordination
- Customer and partner collaboration
- Process improvement and structured delivery management

Bridge & Structural Designer
WSP & COWI, Malmö | 2019 – 2021

- Technical design, calculations and BIM modeling
- C Work in multidisciplinary project environments

- Documentation and quality assurance

TECHNOLOGY & WORKING METHODS

Languages & Development: Java, JavaScript, TypeScript, System Development, Integrations
Backend & Data: REST APIs, SQL Databases
Cloud & DevOps: Microsoft Azure (AZ-900), Docker, CI/CD (CircleCI)
Tools: Git, Jira, Trello, BitBucket, Confluence

Working Approach: Requirements analysis, System understanding, Agile collaboration, Documentation, Quality focus

EDUCATION

Higher Vocational Education – Fullstack Developer (Java)
Teknikhögskolan Lund | 2024 – 2026
Java · Spring Boot · REST APIs · SQL · JavaScript · React · Object-Oriented Programming

Civil Engineering
Malmö University | 2015 – 2019
Technical education with focus on analysis, problem-solving, project work and system understanding.

TECHNICAL PROJECTS (SELECTED)

Fullstack Car Rental System
Development of booking and administration system with focus on user flows, data modeling and system structure (Java, Spring Boot, MySQL, JavaScript).

Library / Student Management System
System for managing data, permissions and workflows with focus on stability and structure (Java, Spring Boot, REST API).

CERTIFICATION

Microsoft Azure Fundamentals (AZ-900) – Certified

LANGUAGES

Swedish (fluent), English (fluent), French (good knowledge), Persian/Dari (native)
Swedish citizenship
